

# FOOD CONVEYOR

## Type Mat Top

### TOP BENEFIT

Conveyors, type Mat Top, are very well suited for handling raw food products, food in containers or packaging in boxes and containers thanks to their flat surface, which allows a smooth transition from line to the other when accelerating or decelerating unstable products at high speed.

### FEATURES AND USES

- This type of conveyor is suitable for mass transport and inline accumulation, for high-speed applications,
- It is a flexible and easy to clean solution designed to resist the intrusion of moisture, dust and contaminants,
- Modular plastic belt, usually polymer or acetal, is very durable and requires little maintenance,

Customizable according to the type of product, its weight

### COMPATIBLE FOODS

- Bread, pastry, biscuit, and pizza,
- Cheese and egg,
- Meat and poultry,
- Fish and Seafood,
- Prepared meals.
- and the desired speed.

### SPECIFICATIONS
